## Subject: Application for Working Student - Product Analytics & Business Intelligence (Werkstudent / Internship)

**Dear Hiring Team at FinTech ScaleUp Europe,**

I am writing to express my strong enthusiasm for the **Working Student - Product Analytics & Business Intelligence** position at **FinTech ScaleUp Europe** in Berlin, Germany (Remote / Hybrid). Currently residing in Berlin and enrolled in the M.Sc. Data Science program at GISMA University of Applied Sciences, I combine rigorous theoretical foundations with direct production experience in full-stack Python engineering, data processing, and machine learning systems (Python, Machine Learning, SQL).

My Master's specialization directly covers **Business Intelligence, Data Visualisation, and Product Analytics**. I architected and delivered the Auslandly Consultancy CRM using React, Supabase, and PostgreSQL with real-time data sync, owning delivery end-to-end. At Crack-ED, I spearheaded sprint CI/CD pipelines and designed analytics dashboards tracking active user engagement. Through these initiatives, I have developed a disciplined approach to translating complex analytical problem sets into performant, reliable software implementations.

In addition to my technical repertoire, I am currently gaining valuable German operational experience working part-time at **Formel D Group** on the **Tesla Gigafactory project** in Berlin-Brandenburg. Conducting rigorous technical quality control and defect inspection on vehicle components adhering to strict German automotive standards has reinforced my commitment to precision, data integrity, and zero-defect execution.

As a registered Master's student based locally in Berlin, I possess full legal work authorization for student employment (Werkstudent up to 20 hours per week during the semester, and full-time during breaks) without requiring visa sponsorship. I communicate fluently in English, possess **German A2** proficiency which I am actively advancing, and can integrate seamlessly into your engineering team immediately.

Thank you for your time and consideration. I welcome the opportunity to discuss in an interview how my technical skills and proactive work ethic can support FinTech ScaleUp Europe's milestones.

Sincerely,

**Dandu Purnachandra Madhukar**
