Subject: Application for Culinary Operations Working Student (all genders) (Werkstudent / Internship)

Dear Hiring Team at HelloFresh,

I am writing to express my strong enthusiasm for the **Culinary Operations Working Student (all genders)** position at **HelloFresh** in Berlin, Berlin, Germany. Currently residing in Berlin and enrolled in the M.Sc. Data Science program at GISMA University of Applied Sciences, I combine rigorous theoretical foundations with direct production experience in full-stack Python engineering, data processing, and machine learning systems (Python, Machine Learning, SQL).

My Master's specialization directly covers **Business Intelligence, Data Visualisation, and Product Analytics**. I architected and delivered the Auslandly Consultancy CRM using React, Supabase, and PostgreSQL with real-time data sync, owning delivery end-to-end. At Crack-ED, I spearheaded sprint CI/CD pipelines and designed analytics dashboards tracking active user engagement. Through these initiatives, I have developed a disciplined approach to translating complex analytical problem sets into performant, reliable software implementations.

During my tenure as a Software Engineering Intern at **Crack-ED** and NLP Intern at **Innomatics Research Labs**, I collaborated within Agile teams to build data processing pipelines, optimize application backends, and benchmark machine learning models. Combined with my GISMA Berlin Master's coursework and independent software builds (such as the Auslandly CRM and AI German Navigation assistant), I bring a structured engineering mindset focused on reliable code quality and clean documentation.

As a registered Master's student based locally in Berlin, I possess full legal work authorization for student employment (Werkstudent up to 20 hours per week during the semester, and full-time during breaks) without requiring visa sponsorship. I communicate fluently in English, possess **German A2** proficiency which I am actively advancing, and can integrate seamlessly into your engineering team immediately.

Thank you for your time and consideration. I welcome the opportunity to discuss in an interview how my technical skills and proactive work ethic can support HelloFresh's milestones.

Sincerely,

Dandu Purnachandra Madhukar
