Subject: Application for Werkstudent Datenanalyse (m/w/d) / 45911 (Werkstudent)

Dear Hiring Team at BSH Hausgeräte GmbH,

I am writing to express my strong enthusiasm for the **Werkstudent Datenanalyse (m/w/d) / 45911** position at **BSH Hausgeräte GmbH** in Berlin 13629, Germany. Currently residing in Berlin and enrolled in the M.Sc. Data Science program at GISMA University of Applied Sciences, I combine rigorous theoretical foundations with direct production experience in full-stack Python engineering, data processing, and machine learning systems (Python, SQL, Data Science, Power BI).

My Master's specialization directly covers **Methods of Prediction, Big Data Analytics, and Statistical Inference**. At Crack-ED, I optimised 15+ complex SQL queries and introduced Redis caching, slashing backend latency by 60% across an LMS serving over 10,000 students. In parallel, I built supervised classification pipelines achieving 82% validation accuracy. Through these initiatives, I have developed a disciplined approach to translating complex analytical problem sets into performant, reliable software implementations.

In addition to my technical repertoire, I am currently gaining valuable German operational experience working part-time at **Formel D Group** on the **Tesla Gigafactory project** in Berlin-Brandenburg. Conducting rigorous technical quality control and defect inspection on vehicle components adhering to strict German automotive standards has reinforced my commitment to precision, data integrity, and zero-defect execution.

As a registered Master's student based locally in Berlin, I possess full legal work authorization for student employment (Werkstudent up to 20 hours per week during the semester, and full-time during breaks) without requiring visa sponsorship. I communicate fluently in English, possess **German A2** proficiency which I am actively advancing, and can integrate seamlessly into your engineering team immediately.

Thank you for your time and consideration. I welcome the opportunity to discuss in an interview how my technical skills and proactive work ethic can support BSH Hausgeräte GmbH's milestones.

Sincerely,

Dandu Purnachandra Madhukar
